Bandung, Indonesia

## SUMMARY

---

I am an Informatics student with a strong focus on web application development, primarily in backend development. I possess a thorough understanding of programming concepts and am committed to continuous learning in information technology. My enthusiasm for solving technical problems allows me to provide efficient solutions while effectively collaborating with teams.

## EDUCATION

---

### TELKOM UNIVERSITY

Bachelor of Informatics

Major in Informatics

Relevant Coursework: Database System, Software Analysis and Design, Software Implementation and Testing

Bandung, Indonesia

Sep 2021 - Present

## EXPERIENCE

---

### Telkom University

Dataset Collector, Data Entry, Frontend Developer, Backend Developer

Bandung, Indonesia

- Collaborated with SDGS Telkom University's "Carbon Ranger" to collect field data.
- Responsible for entering relevant and accurate data into the SDGS Multiclass Classification Website project system.
- Responsible for designing and developing responsive interfaces using HTML, CSS, and Bootstrap.
- Internal internship as a Backend Developer, developing a coffee competition website using Express.js.

### Bangkit Academy 2024 by Google, GoTo, Traveloka

Cloud Computing

Bandung, Indonesia

Feb 2024 – Jun 2024

- Building the backend of the fruit detection application using Express.js
- Connecting the backend to Google Cloud Platform
- Engaged in continuous learning through mentoring sessions provided by industry experts

### PukulEnam

Frontend Developer

Bandung, Indonesia

Sep 2024 – Dec 2024

- Contributed to the SatriaBIPA project as a Frontend Developer, using HTML, CSS, and Tailwind to develop the appearance of the SatriaBIPA website.
- Contributed to the Talas project by developing a news crawler integrated with the database

## SKILLS

---

**Technical Skills:** Experienced with HTML, CSS, Javascript, Laravel, MySQL, Bootstrap, TailwindCSS, Responsive Design

**Environment:** Visual Studio Code, Git, PhpMyAdmin, MySQL Workbench,

**Soft Skills:** Leadership, Communication, Analytical thinking, Problem solving

## PROJECTS

---

### Data Esport

*Final Project of Structure Data*

Repository : <https://github.com/DarmaCahya/Tubes-Stuktur-Data>

- Implementation of single linked list in C++ programming language. This program was created with a case study of a data structure for managing an esports team.

### AnimeFlix

*Final Project of object-oriented programming and RPL implementation*

Repository : <https://github.com/AkbarMuh/AnimeFlixFullStack>

- Animeflix is an anime streaming website built using the Java programming language with the Spring Boot framework, as well as using the MySQL database and JavaServer Pages (JSP) for its web page display.

### **FreshBite**

*Capstone Product Bangkit - Cloud Computing*

Repository : <https://github.com/SryoAji/FreshBite-Bangkit-Capstone>

- FreshBite is a mobile-based application designed to assist users in detecting whether a fruit is fresh or rotten. The function is, users can take a photo of the fruit they want to check then the application will analyze the image and provide information whether the fruit is still suitable for consumption or no longer fresh, using Express.js on the backend for efficient and scalable performance.

### **BrewFest**

*Kerja Praktik - Backend Developer*

Repository : <https://github.com/DarmaCahya/Coffee-Event/tree/master>

- FreshBite is a mobile-based application designed to assist users in detecting whether a fruit is fresh or rotten. The function is, users can take a photo of the fruit they want to check then the application will analyze the image and provide information whether the fruit is still suitable for consumption or no longer fresh, using Express.js on the backend for efficient and scalable performance.
